

Absolutely Accurate!

"Health practitioners see scores of patients every day, generating a multitude of notes regarding patient treatment," notes Mary A. Goehring, executive director and founder of Transcription Plus, LLC, a medical transcription service serving the Hudson Valley region since 1989. "This creates the dreaded chore of extensive documentation for the patient's chart and referring doctors, much of which is required by insurance companies."

Her company prides itself on personalized interface and accuracy, with transcription returned in 24 hours or less. The staff, based entirely in the United States, is highly trained in an extensive range of medical specialties. "We serve physicians in the role of a dependable off-site office team. Precise medical reports are produced expeditiously, alleviating any burden for our clients," Goehring adds.

Transcription Plus offers a HIPAA-compliant secure Web site, making digital voice files easily and instantly accessible. To learn more about their services, call their office at 860-583-2818, or visit www.transcriptionplus.net.
